

Scenario Weighting Worksheet

Members of IMT discuss and analyse plausible scenarios.

Scenario	Description of scenario	
1	Went to Red tarns and fell down bluff while returning in Dark	20.00%
2	Went to Sealey tarns to take photos and fell while returning in the dark	50.00%
3	Went to Hooker valley and fell from rock while getting better shot.	30.00%
4		0.00%
5		0.00%
6		0.00%

Each participant then works independently.

Select the most likely scenario, and assign it a value of 100

Then assign a score between 10 and 100 to all other scenarios,

based on the relative likelihood of that scenario, compared to the one they thought most likely.

Transfer the results to this worksheet.

Participants name	Scenario 1	Scenario 2	Scenario 3	Scenario 4	Scenario 5	Scenario 6	ROW		
Jim	50	100	50						
Bob	20	100	80						
Billy	50	100	50						
Column totals	120	300	180	0	0	0	0	Sum of column totals	Without ROW
								600	600
Scenario % consensus	20.00%	50.00%	30.00%	0.00%	0.00%	0.00%	0.00%	100%	
Consensus without ROW	20.00%	50.00%	30.00%	0.00%	0.00%	0.00%		100%
