## For segmented region A

Each member of IMT works independently.
Select the segment which is the most likely to contain the missing person, and assign it value of 100 .
Then assign a value between 1 and 100 to all the other segments, depending on how likely the missing person is in that segment, compared
to the most likely segment of 100 .
Transfer their scores to the table below.

| Participants | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg | Seg |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
